

QUALITY POLICY

RADIOLOGIA, S.A has as a priority objective the satisfaction of the needs and expectations of its customers in the field of the Medical Systems business.

With this objective in mind, the company's Management has decided to develop its activity by establishing a quality management system in accordance with the requirements specified in the ISO 9001 and ISO 13485 standards and the applicable regulatory requirements. Likewise, the company's products are designed and manufactured in such a way that they meet the regulatory requirements of the countries for which these products are intended.

The company's Senior Management understands that these objectives are achieved through:

- The knowledge, awareness, motivation and participation of all company employees in activities related to Quality.
- Training, qualification and development of all personnel.
- Teamwork and individual responsibility of each of the workers of company.
- The analysis of the data provided by our customers.
- The identification and application of the processes necessary to ensure that the Quality Management System is effective.
- Preventive detection of problems
- Taking actions that ensure the continuous improvement of Quality.
- Potential contributions by our suppliers.
- Respect and conservation of the environment

It is, therefore, the responsibility of all RADIOLOGIA employees to carry out what is established in its Quality Management System, deployed in all supporting documentation thereof, in the part that is applicable to each one.

Manuel
Manuel Martínez Álvarez
